## Key & interpreting the data

Allergy data detailed in the table has been derived from specifications obtained from the suppliers of the products. Allergy data for condiments (pepper, salt, etc.) which you may add to your food, are listed at the bottom of the table (i.e. not with the dish).

NB the staff need to be informed of your allergy every time you dine with us even if you have eaten the dish before so that every precaution can be taken in our kitchen to prevent cross contamination.

Please note that due to the nature of cooking our deep fried products cannot be guaranteed to be free from cross contamination with other allergens. If you are unsure which of our products go through the deep fryer please ask a member of our staff.

'N' means that the allergen is not part of the product as it is delivered by the supplier.

'Yes' in a column entitled 'allergen(s) (e.g. gluten) present' indicates that the product contains that allergen & is, therefore, not suitable for you if you suffer from this allergy.

'C' means that this allergen is present in the manufacturing site/factory/supply chain & our suppliers believe there is a significant risk that this allergen could cross-contaminate the food.

The 'Yes'/'No' in the column entitled 'suitable for vegans'/'suitable for vegetarians' details information supplied by the product manufacturer. Our kitchens have limited space and as such we cannot always preserve the vegetarian status of a meal.

For example we only have one fryer for breaded products and so breaded vegetable products cannot be considered vegetarian.

'Data unavailable' is where ingredient detail for the item/dish is currently unavailable from the supplier & will be added onto the table upon obtaining it. Or because it is bought at local level in-house.

Gluten is a protein component of wheat, rye, barley & oats. If you are intolerant to gluten then please consult the Wheat, Rye, barley & oat columns.

Additives are artificial antioxidants, colours, flavourings, preservatives, sweeteners & flavour-enhancers.

The Treenut column indicates the presence of the following; almonds, brazils, cashews, hazelnuts, macadamias, pecans, pistachios, walnuts & their respective derivatives.

NB: We have taken all reasonable steps to ensure that this table is accurate. However, we cannot guarantee that the product is '100% free from' that component because of the risk of unexpected cross-contamination. Your statutory rights are not affected.
